

PRESS RELEASE

FOR IMMEDIATE RELEASE

Metegridity Inc. and Skystone International Announce New Partnership

Calgary, Alberta. July 9, 2016

Metegridity Inc., a global leader in Enterprise Asset Management software specifically for plants, pipelines, and facilities has entered into a partnership with Skystone International, an engineering services firm, to provide a secure, cloud based asset management software system which will allow Skystone to develop qualitative and quantitative risk based inspection plans for their customers.

Skystone will leverage **Visions Enterprise** to provide full risk assessment capabilities allowing them to manage risk based inspection intervals, and enable their customers to focus on equipment requiring the most attention. The software will allow Skystone to perform asset record keeping, inspection planning and management, processing and analysis of inspection data, corrosion assessments, and reporting for all aspects of facility and pipeline mechanical integrity.

"We see the opportunity to work with Skystone as a tremendous benefit to expose our software capabilities to smaller companies. We have been serving enterprise clients for years and feel there's a lot of value in providing our new cloud based service to our partners so they can support their customers" says Adrian Met, CEO at Metegridity Inc.

"The partnership with Metegridity Inc. to offer Visions to our Integrity Program clients is part of Skystone's ongoing commitment to bringing our clients world class technology in a cost effective manner." says Hal Hamilton, President and CEO at Skystone International LP.

About Metegridity

Metegridity Inc. provides integrated Quality and Asset Integrity Management solutions for plants, pipelines and facilities. Our comprehensive suite of products facilitates maximum ROI on inspection data management projects. With **twenty years in business** and software in **over 850 facilities worldwide**, Metegridity is a leader in asset integrity management software and proudly serves some of the world's largest process manufacturing companies in Oil & Gas, Chemical, and Power Generation.

About Skystone

Skystone International LP is the industry leader in integrity engineering, inspection services, cathodic protection and emergency response management for the oil and gas industry in Western Canada. Since our inception in 1998, we have successfully managed programs for a wide range of clients. With our full-service model, Skystone is the outsource **Integrity and Emergency Management** department for many companies, while in other instances, we provide Field and Engineering Support to in-house teams to ensure their assets are safe and reliable.
